

JENS PIND LINKAGE

Jens Pind Linkage is a great weave to use for bracelets and other forms of jewelry. It also only requires one ring size, making it easy to put together on a whim.

The first step is to put three rings together like the photo to the right. Each ring should be attached to the other two rings.

STEP 01

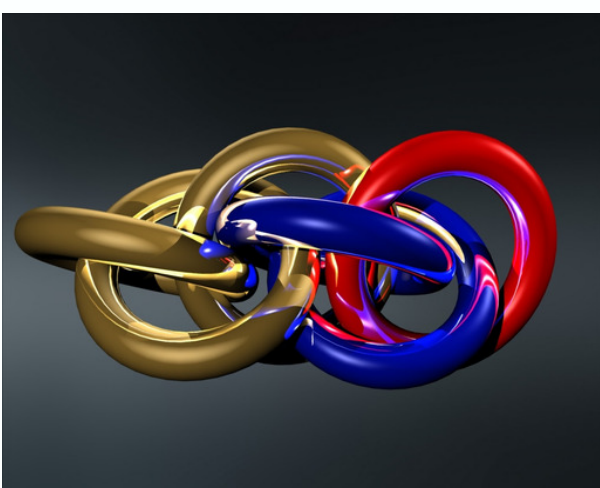

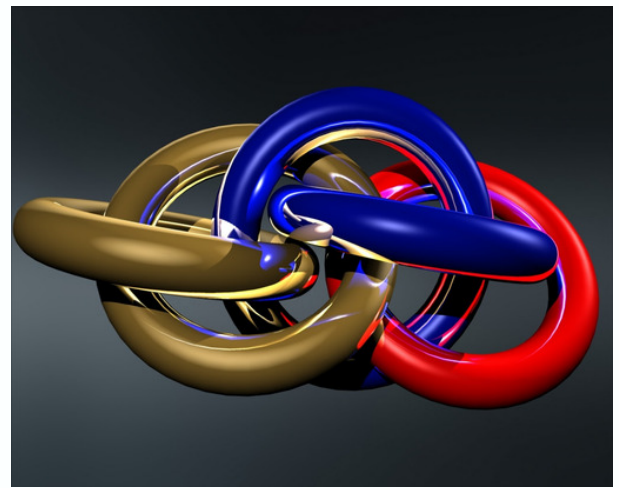

STEP 02

The next step is to put a ring (red) into the rightmost two rings (blue). It should end up being the same orientation as the first ring (gold).

Then put another ring (red) through the last two (blue). It should be the same orientation as the ring three rings back.

STEP 03

STEP 04

Once again, put a ring (red) through the last two rings (blue). It should be the same orientation as the ring three rings back.

Keep on adding to it, remembering that the ring you put on will have a similar orientation to the ring three rings back. Eventually, you might end up with something like this.

STEP 05
